

Alligator Winbag®

*Need temporary storage for fluids up to 350m³?
No problem! Our Winbag is flexible in use and can
be sited on almost any level, flat surface.*

With the Alligator Winbag, you can realise temporary storage for fluids at any suitable location. The Winbag offers you the opportunity for rapid installation and removal of 100 to 350m³ of fluid storage.

DESIGN AND IMPLEMENTATION

The Alligator Winbag can be used on almost any flat surface and is suitable for all non-aggressive fluids.

ROLLING UP USING THE WINSYSTEM®

The Alligator Winsystem is a rolling-up system especially developed for the Winbag, consisting of a support with a rotating reel frame mounted on it. The system is available as a complete trailer version or as a liftable version (for use with your tractor or shovel).

If you decide to purchase a Winbag, Albers Alligator can provide you with dependable advice concerning the placement, use, emptying and rolling up of your Winbag after use. As a standard, the Winbag is supplied with two 6" Perrot KKV connections, whereas almost any other connection is possible on request.

STRONG AND THEREFORE SAFE

The mechanical forces that arise during the use of the Alligator Winbag are taken up straightforwardly by the strong fabric. Based on strength calculations, the primary components such as material, welded seams and fixing points are dimensioned with very generous safety margins. Albers Alligator makes the Winbag from a polyester fabric coated on both sides, with a production certificate (KIWA 5111).

Alligator Winbags can be connected together, so that a large yet still mobile storage capacity is realised.

STRICT REQUIREMENTS ENSURE GOOD QUALITY

The supply of high-quality products is always a top priority at Albers Alligator. The plastics that Albers Alligator uses comply with the strictest requirements; they are continually tested and processed using the most modern methods.

Through the use of specially-designed machinery, Albers Alligator is always able to produce top-quality welded seams. The strenght of these welded seams determine the quality of the end-product and they have proved themselves for over 35 years. A 3 years warranty is provided on the Alligator Winbag, when used according to manual.

ADVANTAGES OF THE ALLIGATOR WINBAG® AND THE WINSYSTEM®

- Fully sealed one piece storage system
- Can be fully emptied by simply rolling it up with the Winsystem
- Easy to move to another site
- Capacity from 100 to 350m³
- Can be used on almost any level, flat surface
- The Alligator Winbag offers you a dependable, flexible and affordable storage system
