

Alligator slurry lagoon

**Do you need cost-effective storage for liquids up to 100,000 m³?
The Alligator slurry lagoon offers you flexible storage for installation on any surface.**

The Alligator slurry lagoon is made of a PP foil installed in an excavation. The foil is resistant to many types of liquid and the effects of UV radiation. This ensures a long service life. The basin is covered by a floating cover made of a two-sided coated fabric. This material was developed especially for use in a slurry environment.

DESIGN AND INSTALLATION

The Alligator slurry lagoon can be supplied in various shapes and, depending on the highest groundwater level, it can be installed partly below surface level. The excavated soil is used for the dykes.

As standard, the Alligator lagoon is equipped with

- suction/filler pipe
- valves
- spillage container
- air vents
- closable inspection/mixer opening
- slope protection

Both the design and the installation are in our own, skilled hands at Albers Alligator. In this way

your personal wishes can be realised rapidly and efficiently.

MORE THAN 40 YEARS OF EXPERIENCE IN SLURRY STORAGE

Carefree slurry storage is essential for you. Therefore, the engineers at Albers Alligator have developed a system that ensures that even in the event of formation of gas or foam, the top cover of your slurry lagoon remains taut on the slurry. This ensures it will not be affected by wind. The Alligator slurry lagoon is KIWA certified (No. K95937/02)

ALWAYS AN EXPERT NEARBY

Albers Alligator delivers its products both nationally and internationally. Local dealer networks are used to make this possible. This means that there is always an expert nearby. The Alligator slurry lagoon is suitable for multiple purposes and is used in a wide range of markets, including industry, civil engineering and agriculture.

STRICT REQUIREMENTS ENSURE GOOD QUALITY

The supply of high-quality products is always a top priority at Albers Alligator. The materials that Albers Alligator uses comply with the strictest requirements; they are continually tested and processed using the most modern methods.

Through the use of specially-designed machinery, Albers Alligator is always able to produce top-quality welded seams. The strength of these welded seams determines the quality of the end-product and they have proved themselves for over 40 years. All Albers Alligator products are guaranteed. The length of the guarantee depends on the medium, the use and the conditions.

ADVANTAGES OF THE ALLIGATOR LAGOON

- No expensive foundation structure needed.
- Suitable for all kinds of (mixed) slurries.
- Available up to 100,000 m³.
- Option to provide with a floating cover.
- An affordable solution for your storage problems.
- Albers Alligator has more than 40 years of experience in slurry lagoons.
